

xAI: HERE'S WHAT TO KNOW

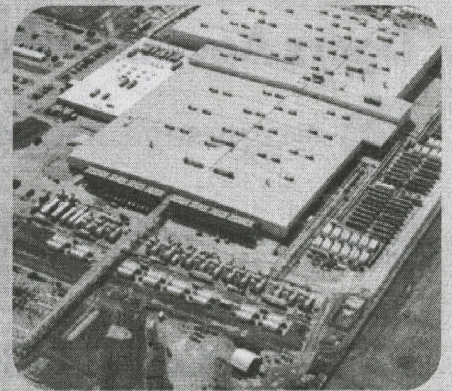

After a year of the announced first xAI data center named Colossus, our community has suffered from massive air pollution as consequence of xAI's rapid expansions into South Memphis.

In this time xAI/CTC Property LLC has:

- Acquired a total of **307 acres of land** in South Memphis 38109 (including Colossus facility, Colossus 2 facility, and Colossus Water Recycling Plant).
- **Illegally powered** 33-35 smog emitting gas turbines at Colossus facility over the span of a year.
- Been approved for the use of **15 smog emitting gas turbines** by Shelby County Health Department, despite major public safety concerns (as of July 2, 2025).
- Utilized at least **200,000 AI chips** in Colossus and expressed goals of using 1,000,000 AI chips in the future.
- Imported an **entire power plant** from overseas to install at xAI's facilities to keep up with the power demand equivalent to the power demands of 1,900,000 homes.
- Been recognized as Memphis' **#1 polluter of air quality**.
- Bought local officials and community members to act as **mouthpieces to spread lies** about the consequences of xAI's operations and future in Memphis.

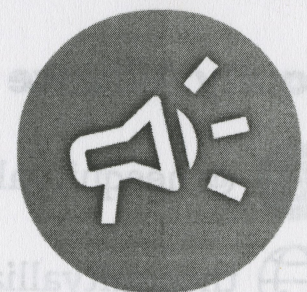

**Meet our new
power hungry
neighbors,
Colossus and
Colossus 2 coming
to zipcode 38109
near you!**

Let's come together as a community

Join us Thursdays at T.O. Fuller State Park Pavilion #3 from 6-8 PM for the People's College for a weekly teach-in and potluck featuring guest speakers every week!
